

Non-alkali Fiberglass Tape

Non-alkali fiberglass tape abbreviated as non-alkali tape is woven of non-alkali fiberglass. With its features of heat-resistance and insulation, it can be used as the bindings of coils for electrical machinery and appliances.

Appearance: According to "JC285-80" non-alkali tape.

Length: Each reel contains 50 meters of the tape. Tapes, longer than 6 meters, have connections only once in a reel.
